

SEVEN ORIGINAL PAPERS • AUDITED RECURRENCE COUNTS

Entrepreneurship Development

Previous-Year Question Paper Compendium
with 2026 Predicted / Model Paper

One PDF for focused exam preparation.

Exact and near-repeat analysis, topic appearance counts, evidence labels, a syllabus-balanced 2026 model paper, and every original source paper in chronological order.

The prediction is unofficial and not guaranteed.

ORIGINAL QUESTION PAPERS	16

How to use this compendium

This book puts **all seven supplied previous-year Entrepreneurship Development papers into one PDF**, followed by no missing source paper. Before the originals, it gives a transparent recurrence analysis and one **clearly unofficial 2026 predicted/model paper**.

Important: Prediction is not certainty. The corpus covers seven programme variants across only four exam years (2018, 2019, 2022 and 2023). Same-year variants may share setters or syllabus emphasis. Use the prediction to practise; revise the full current syllabus.

What is included

1. Corpus and pattern audit.
2. Exact and near-repeat question groups.
3. Broad-theme and specific-topic appearance counts.
4. Evidence labels showing the exact paper and question number.
5. A balanced 70-mark 2026 predicted/model paper aligned to current Modules 1-6.
6. The seven original papers, in chronological order, reproduced as source pages.

Quick result: what repeated most?

Priority	Normalised topic	Separate assessed prompts	Distinct papers
1	MSME and entrepreneurship-support institutions	12	7/7
2	Business-plan purpose, components, formulation and evaluation	12	7/7
3	International-market entry modes	9	6/7
4	Entrepreneurial process, enterprise establishment and venture life cycle	6	6/7
5	Business models, BMC and value proposition	10	5/7
6	Seed, angel, venture-capital and equity finance	7	5/7
7	Entrepreneurial traits, competencies, mindset and resilience	6	5/7
8	Government policy, incentives, tax holidays and Startup India	6	5/7
9	Intellectual property and protection	6	5/7
10	Entrepreneur types and profiles	5	5/7

Highest near-repeat: international-market entry methods appeared in **6 of 7 papers** as substantially the same long-answer task. The entrepreneurial process/steps of establishing a venture appeared as a near-repeat in **5 of 7 papers**.

How the counts work

- A **paper count** answers: "In how many of the seven papers did this topic appear at least once?"
- A **prompt count** answers: "How many separately assessed prompts tested this topic?"
- A topic is counted at most once within one top-level numbered question.
- Explicit case subquestions and genuine OR alternatives count separately when they independently test a topic.
- Exact repeats, near repeats and broader thematic recurrence are reported separately; they must not be added together.
- Offered-question mark exposure is not the same as marks a student had to answer because Sections A-C include choices.

Source-paper index

Session	Programme	Course code	Source pages	Compendium start page*
March/April 2018	BCom Regular	C1 15 MC 603	3	17
March/April 2018	BCom International Accounting & Finance	C4 15 MC 603	2	21
March/April 2019	BCom Regular	C1 15 MC 603	2	24
March/April 2019	BCom International Accounting & Finance	C4 15 MC 603	2	27
June 2022	BCom International Accounting & Finance	C4 15 MC 603	3	30
May 2023	BCom Regular	C1 15 MC 603	3	34
May 2023	BCom Strategic Finance	C6 20 MC 602	2	38

*The listed page is the divider immediately before the reproduced original paper. PDF bookmarks also take you directly to each paper.

Historical paper pattern: unchanged in 7/7 papers

Section	Offered	Answer rule	Marks each	Required marks
A	12	Any 10	1	10
B	5	Any 3	6	18
C	4	Any 2	15	30
D	1 case	Compulsory	12	12
Total	22 slots	16 numbered answers	-	70

Entrepreneurship Development Past-Paper Frequency Analysis

Scope and caution. This is a descriptive analysis of seven programme-variant papers, not seven independent annual samples. It supports revision prioritisation, not statistical certainty or a guaranteed 2026 paper. The six current module analyses are used only to align names and present-syllabus scope; they are not counted as historical question evidence.

Executive findings

- Corpus: **7 papers**, **154 official numbered slots**, and **168 conservative assessed-prompt units**.
- Every paper uses the same required-mark architecture: **Section A 10 + Section B 18 + Section C 30 + Section D 12 = 70 marks**.
- Mechanically exact top-level wording groups: **5**. Curated near-repeat task groups: **15**.
- The strongest paper-spanning topic families are business-plan formulation/evaluation and MSME/support institutions (both represented across all seven papers), followed by international-market entry and the entrepreneurial process/venture life cycle.
- High historical frequency is not a probability estimate. Programme variants from the same year may reflect shared setters/syllabi, and the current six-module structure contains topics with little historical exposure.

Corpus and source audit

Paper	Programme	Analysis source	Top-level slots	Required marks
2018 Regular	BCom Regular	.analysis/output/paper-analysis/2018.json	22	70
2018 IAF	BCom International Accounting & Finance	.analysis/output/paper-analysis/2018.json	22	70
2019 Regular	BCom Regular	.analysis/output/paper-analysis/2019.json	22	70
2019 IAF	BCom International Accounting & Finance	.analysis/output/paper-analysis/2019.json	22	70
2022 IAF	BCom International Accounting & Finance	.analysis/output/paper-analysis/2022.json	22	70
2023 Regular	BCom Regular	.analysis/output/paper-analysis/2023.json	22	70
2023 Strategic Finance	BCom Strategic Finance	.analysis/output/paper-analysis/2023.json	22	70

All four JSON files were parsed: `paper-analysis/2018.json`, `2019.json`, `2022.json`, and `2023.json`. Together they contain the seven paper records listed above.

Counting and marks rule

1. **Official slot:** Q1–Q22 remains the unit for section choice and official marks.
2. **Thematic occurrence:** a normalized topic is counted at most once in a top-level numbered question, even if the wording repeats the topic within that question.
3. **Permitted independent units:** an explicitly assessed case subquestion or an encoded OR alternative may contribute a separate occurrence when it independently tests the topic. Thus the seven Q22 parents are replaced by 19 case directives, and the two encoded OR parents are replaced by four alternatives.
4. **Conjunctive subparts:** non-case conjunctive lists remain one top-level occurrence. For example, 2018 Regular Q13 contributes once to crowdfunding and once to angel/VC finance, but only once to their shared broad finance theme.
5. **Compound topics:** one prompt may map to more than one specific family when it genuinely tests both; within a broad theme it is deduplicated. Topic rows therefore must not be summed as if mutually exclusive.
6. **Marks:** printed child marks are used when available. OR alternatives inherit the full parent-slot marks. No equal split is invented where a case gives only a parent total; those rows report an unknown occurrence and the distinct

parent-mark pool. 'Known mark exposure' describes offered prompts, not marks a student necessarily answered after choice. A zero in a year/programme/section mark breakdown means that occurrences exist but none has a known child allocation—not that any question carried zero marks.

7. **Papers denominator:** distinct-paper coverage is always out of 7, while year and programme columns expose clustering among variants.

This yields 154 - 7 case parents - 2 OR parents + 19 case directives + 4 OR alternatives = 168 assessed-prompt counting units.

Historically invariant 70-mark pattern

Section	Questions offered	Answer rule	Marks each	Required marks	Seven-paper result
A	12	Answer any 10	1	10	7/7 identical
B	5	Answer any 3	6	18	7/7 identical
C	4	Answer any 2	15	30	7/7 identical
D	1 case	Compulsory	12	12	7/7 identical
Total	22 numbered slots	16 answered slots	—	70	7/7 identical

The offered slot-mark inventory is 114 per paper (12 + 30 + 60 + 12), but choice reduces the required score to 70. Across seven papers that is 798 offered slot marks and 490 required marks; 798 must not be mistaken for attainable marks.

Exact versus near-repeat wording

Exact means identical after only Unicode normalization, lowercasing, punctuation removal, and whitespace collapse—no synonym replacement or stemming. **Near repeat** means the assessed task and expected answer core are substantially the same but command verb, scope, context, or mark depth differs. Everything else can still recur thematically without being called a wording repeat. A near-repeat task family may contain an exact-wording subset; for that pair, exact takes precedence, and exact/near totals must not be added.

Mechanically exact top-level wording groups

Group	Normalized wording	Occurrences	Papers	Evidence
ER01	explain the stages of entrepreneurial process	2	2/7	2018 IAF Q21; 2023 Regular Q18
ER02	what is crowd funding	2	2/7	2018 IAF Q3; 2019 Regular Q9
ER03	what is meant by intellectual property	2	2/7	2018 Regular Q5; 2023 Regular Q9
ER04	what is the meaning of tax holiday	2	2/7	2018 Regular Q8; 2023 Regular Q3
ER05	write short notes on a crowd funding b angel investing	2	2/7	2018 Regular Q13; 2023 Regular Q16

Curated near-repeat assessed-task groups

Group	Common assessed task	Occurrences	Papers	Evidence
NR01	International-market entry methods	6	6/7	2018 Regular Q20; 2019 Regular Q20; 2019 IAF Q21; 2022 IAF Q21; 2023 Regular Q21; 2023 Strategic Finance Q19
NR02	Entrepreneurial process / steps in establishing a venture	5	5/7	2018 Regular Q19; 2018 IAF Q21; 2019 Regular Q21; 2019 IAF Q18; 2023 Regular Q18
NR03	Entrepreneurship's contribution to economic development	3	3/7	2019 Regular Q14; 2019 IAF Q20; 2022 IAF Q18
NR04	Purpose, importance or objectives of a business plan	3	3/7	2018 Regular Q4; 2019 IAF Q2; 2023 Regular Q6
NR05	Business-plan content, components or functional sections	5	5/7	2018 Regular Q14; 2019 Regular Q19; 2022 IAF Q15; 2023 Regular Q20; 2023 Strategic Finance Q17

Group	Common assessed task	Occurrences	Papers	Evidence
NR06	Women entrepreneurs' problems or challenges	3	3/7	2018 Regular Q18; 2019 IAF Q13; 2023 Regular Q22.3
NR07	Entrepreneurial traits or competencies	5	5/7	2018 Regular Q22(a); 2019 Regular Q17; 2019 IAF Q22(a); 2022 IAF Q13; 2023 Regular Q22.2
NR08	Sources of business or project ideas	3	3/7	2018 Regular Q10; 2022 IAF Q19; 2023 Strategic Finance Q1
NR09	Sources of fixed capital	2	2/7	2019 Regular Q10; 2022 IAF Q8
NR10	Exit-strategy concept or selection	3	2/7	2018 IAF Q17; 2018 IAF Q22 directive 2; 2019 IAF Q12
NR11	Challenges in international markets or trade	2	2/7	2019 IAF Q17; 2023 Regular Q15
NR12	Types of startups	2	2/7	2018 Regular Q15; 2023 Regular Q17
NR13	Meaning of franchising	2	2/7	2018 Regular Q6; 2019 IAF Q11
NR14	Types of business models	2	2/7	2019 IAF Q16; 2023 Regular Q2
NR15	Tax holiday meaning or benefit	3	3/7	2018 Regular Q8; 2023 Regular Q3; 2023 Strategic Finance Q6

Broad-theme frequency

Rank	Broad theme	Prompt occurrences	Distinct papers	Years	Programmes	Sections	Latest	Known mark exposure*
1	Business models, plans, validation, growth and exit	37	7/7	2018, 2019, 2022, 2023	BCom International Accounting & Finance, BCom Regular, BCom Strategic Finance	A, B, C, D	2023	140 + 4 unallocated occurrence(s) within 36 marks of distinct parent pool(s)
2	Ownership, venture process, legal framework and intellectual property	24	7/7	2018, 2019, 2022, 2023	BCom International Accounting & Finance, BCom Regular, BCom Strategic Finance	A, B, C	2023	142
3	Entrepreneurship foundations, types, traits and development	23	7/7	2018, 2019, 2022, 2023	BCom International Accounting & Finance, BCom Regular, BCom Strategic Finance	A, B, C, D	2023	84 + 2 unallocated occurrence(s) within 12 marks of distinct parent pool(s)
4	Environment, policy, support ecosystem and technology	22	7/7	2018, 2019, 2022, 2023	BCom International Accounting & Finance, BCom Regular, BCom Strategic Finance	A, B, C	2023	98
5	International entrepreneurship, market entry and trade	21	7/7	2018, 2019, 2022, 2023	BCom International Accounting & Finance, BCom Regular, BCom Strategic Finance	A, B, C	2023	140
6	Entrepreneurial finance and valuation	17	7/7	2018, 2019, 2022, 2023	BCom International Accounting & Finance, BCom Regular, BCom Strategic Finance	A, B, C, D	2023	63
7	Ideas, opportunity, innovation, marketing and strategic analysis	14	6/7	2018, 2019, 2022, 2023	BCom International Accounting & Finance, BCom Regular, BCom Strategic Finance	A, B, C, D	2023	61 + 1 unallocated occurrence(s) within 12 marks of distinct parent pool(s)
8	Women, social, green and sustainable entrepreneurship	10	6/7	2018, 2019, 2023	BCom International Accounting & Finance, BCom Regular, BCom Strategic Finance	A, B, C, D	2023	37 + 1 unallocated occurrence(s) within 12 marks of distinct parent pool(s)
9	Venture operations, people, profitability and risk	5	2/7	2018, 2023	BCom International Accounting & Finance, BCom Strategic Finance	C, D	2023	27

*Known mark exposure is non-additive across interdisciplinary prompts and excludes unprinted case splits; see the counting rule.

Specific-topic frequency

Rank	Stable topic family	Occurrences	Papers	Years	Programmes	Sections	Latest (gap to 2026)	Known mark exposure*
1	MSME and entrepreneurship-support institutions	12	7/7	2018, 2019, 2022, 2023	BCom International Accounting & Finance, BCom Regular, BCom Strategic Finance	A, B, C	2023 (3y)	74

- **Business models, Business Model Canvas and value proposition (10 prompts; 5/7):** 2018 IAF Q9; 2018 IAF Q12; 2018 IAF Q14 OR-2; 2018 IAF Q22 directive 1; 2019 IAF Q16; 2022 IAF Q5; 2022 IAF Q6; 2023 Regular Q2; 2023 Strategic Finance Q5; 2023 Strategic Finance Q8.
- **Seed, angel, venture-capital and equity finance (7 prompts; 5/7):** 2018 IAF Q20; 2018 Regular Q7; 2018 Regular Q13; 2019 IAF Q15; 2019 Regular Q6; 2019 Regular Q13; 2023 Regular Q16.
- **Entrepreneurial traits, competencies, mindset and resilience (6 prompts; 5/7):** 2018 Regular Q22(a); 2018 Regular Q22(c); 2019 IAF Q22(a); 2019 Regular Q17; 2022 IAF Q13; 2023 Regular Q22.2.
- **Government policy, incentives, tax holidays and Startup India (6 prompts; 5/7):** 2018 Regular Q8; 2019 IAF Q10; 2019 Regular Q8; 2023 Regular Q3; 2023 Regular Q19; 2023 Strategic Finance Q6.
- **Intellectual property and protection (6 prompts; 5/7):** 2018 IAF Q15; 2018 Regular Q5; 2019 Regular Q5; 2019 Regular Q11; 2023 Regular Q9; 2023 Strategic Finance Q13.
- **Entrepreneur types and profiles (5 prompts; 5/7):** 2018 IAF Q5; 2019 Regular Q1; 2022 IAF Q2; 2023 Regular Q12; 2023 Strategic Finance Q18.
- **Trade blocs, protectionism, WTO and international trade institutions (7 prompts; 4/7):** 2018 IAF Q16 OR-2; 2018 Regular Q2; 2018 Regular Q17; 2019 IAF Q4; 2019 IAF Q6; 2019 IAF Q8; 2022 IAF Q17.
- **Entrepreneurship and economic, social or regional development (5 prompts; 4/7):** 2019 IAF Q20; 2019 Regular Q3; 2019 Regular Q14; 2022 IAF Q18; 2023 Strategic Finance Q9.

- **Feasibility, location and capital-cost estimation (5 prompts; 4/7):** 2019 IAF Q9; 2019 Regular Q19; 2022 IAF Q4; 2022 IAF Q20; 2023 Regular Q4.
- **Global markets, international opportunities and challenges (5 prompts; 4/7):** 2019 IAF Q17; 2019 Regular Q7; 2019 Regular Q15; 2023 Regular Q15; 2023 Strategic Finance Q16.
- **Startup or venture challenges, failure and recovery (5 prompts; 4/7):** 2019 IAF Q7; 2019 Regular Q2; 2019 Regular Q12; 2023 Regular Q13; 2023 Strategic Finance Q20.
- **Business ideas, opportunity recognition and project selection (5 prompts; 4/7):** 2018 Regular Q3; 2018 Regular Q10; 2019 Regular Q22(a); 2022 IAF Q19; 2023 Strategic Finance Q1.
- **Crowdfunding (4 prompts; 4/7):** 2018 IAF Q3; 2018 Regular Q13; 2019 Regular Q9; 2023 Regular Q16.
- **Scaling, diversification and growth strategy (4 prompts; 4/7):** 2018 Regular Q22(b); 2019 Regular Q22(b); 2022 IAF Q22.2; 2023 Regular Q1.
- **Entrepreneurial marketing, customers and sales forecasting (6 prompts; 3/7):** 2018 IAF Q14 OR-1; 2018 IAF Q14 OR-2; 2018 IAF Q18; 2022 IAF Q22.2; 2023 Strategic Finance Q11; 2023 Strategic Finance Q22.3.
- **Women entrepreneurs, gender barriers and support (6 prompts; 3/7):** 2018 Regular Q18; 2019 IAF Q1; 2019 IAF Q13; 2019 IAF Q22(2); 2019 IAF Q22(3); 2023 Regular Q22.3.
- **Forms of ownership, legal forms and family business (4 prompts; 3/7):** 2018 Regular Q12; 2023 Regular Q11; 2023 Strategic Finance Q10; 2023 Strategic Finance Q21.
- **Exit strategies (4 prompts; 3/7):** 2018 IAF Q17; 2018 IAF Q22 directive 2; 2019 IAF Q12; 2022 IAF Q14.
- **Social, green and sustainable entrepreneurship (4 prompts; 3/7):** 2018 IAF Q7; 2019 Regular Q22(a); 2023 Strategic Finance Q3; 2023 Strategic Finance Q12.
- **Capital needs, sources and financial management (3 prompts; 3/7):** 2019 Regular Q10; 2022 IAF Q8; 2023 Strategic Finance Q22.2.
- **Bootstrapping, personal, family and love money (3 prompts; 3/7):** 2018 Regular Q9; 2019 IAF Q3; 2022 IAF Q7.
- **Entrepreneur meaning, foundations, evolution and roles (3 prompts; 3/7):** 2022 IAF Q1; 2023 Regular Q7; 2023 Strategic Finance Q7.
- **Entrepreneurial environment, ecosystem, incubators and accelerators (3 prompts; 3/7):** 2018 IAF Q10; 2019 Regular Q4; 2023 Regular Q5.
- **Operations, financial control, profitability and risk management (4 prompts; 2/7):** 2018 IAF Q19; 2023 Strategic Finance Q22.2; 2023 Strategic Finance Q22.3; 2023 Strategic Finance Q22.4.

Interpretation for 2026 preparation

- **Very broad historical reach:** business planning, support institutions/MSMEs, international entry, venture process, business models, finance, and entrepreneur/development questions. These span sections rather than belonging to one fixed mark band.
- **High-mark persistence:** international entry repeatedly occupies Section C; enterprise establishment/process and business planning also recur at 15 marks or in the compulsory case. This justifies long-answer preparation, not a claim that the same questions must return.
- **Recent but programme-sensitive:** legal forms, startup challenges, digital tools, and operational case questions are especially visible in the 2023 Strategic Finance variant. Programme clustering should be treated as breadth evidence, not independent replication.
- **Current-syllabus hedge:** responsible innovation, DPDPA/data compliance, PoC/prototype/MVP, social-impact measurement, AI/IoT/AR/VR/Blockchain, cross-cultural entrepreneurship, and international regulation are explicit in the present modules but have sparse or no direct historical counterparts. They remain legitimate model-paper material despite low historical frequency.

Current-syllabus alignment boundaries

- The historical S18 family bundles feasibility, business-location and capital-cost prompts. Feasibility is directly current; location/cost are retained as historical variants and are not represented as equally explicit present-module headings.
- The historical S13 family includes failure/recovery language. Its direct current anchors are entrepreneurial risk, resilience and scaling challenges, not a standalone turnaround unit.

- GEM/TEA remains in the historical ledger (S39), but it is not promoted into the model paper because it is not an explicit core item in the present six-module map.

Limitations

1. Seven papers across four exam years are too few for statistical certainty, and same-year programme variants are not independent draws.
2. Historical syllabi/programme emphases differ; current-module alignment does not retroactively turn old questions into current-syllabus evidence.
3. Offered questions are analysed, not the subset any one student answered.
4. Unknown case mark splits are left unknown; multi-topic and OR evidence makes mark totals deliberately non-additive.
5. Near-repeat classification is a documented analytical judgment. Exact-repeat groups are mechanically reproducible under the stated normalization.

The accompanying `prediction_2026.md` is therefore a **predicted/model paper only**, not an official paper or guarantee.

2026 PREDICTED / MODEL PAPER — ENTREPRENEURSHIP DEVELOPMENT

CLEAR STATUS: UNOFFICIAL PREDICTION / MODEL PAPER. This is a revision aid built from seven programme-variant papers and aligned to the present six-module structure. It is **not** issued by the college, is **not guaranteed**, and does **not** claim statistical certainty.

Time: 3 Hours

Maximum Marks: 70

Basis and confidence language

The model emphasizes historically broad families such as business planning (12 prompts across 7/7, latest 2023), support institutions (12 prompts across 7/7, latest 2023), international entry (9 prompts across 6/7, latest 2023), and venture process (6 prompts across 6/7, latest 2023). It also deliberately includes current-syllabus topics with sparse historical evidence so Modules 1–6 remain balanced.

- **Tier A — strong preparation priority:** direct present-module fit plus either five-paper breadth or four-paper breadth with substantial high-mark exposure.
- **Tier B — moderate preparation priority:** direct or adjacent present-module fit with at least three-paper recurrence, or a recent high-mark appearance.
- **Tier C — syllabus hedge:** explicitly current but historically sparse/absent; included for coverage, not because frequency predicts it.
- **Ranking heuristic:** within a tier, order by distinct-paper breadth, then known mark exposure and recency; use current-module coverage gaps as the final editorial tie-break. This is a transparent revision-priority heuristic, not a probability model.

SECTION A

Answer any TEN questions. Each carries 1 mark. (10 × 1 = 10)

1. Who is an entrepreneur? **[1 mark]**
2. State one difference between an entrepreneur and an intrapreneur. **[1 mark]**
3. What is opportunity recognition? **[1 mark]**
4. State any two impact dimensions used to evaluate an innovation responsibly. **[1 mark]**
5. What is a Limited Liability Partnership (LLP)? **[1 mark]**
6. What is a trade secret? **[1 mark]**
7. What is a Business Model Canvas? **[1 mark]**
8. State one difference between a prototype and a minimum viable product (MVP). **[1 mark]**
9. What is a business incubator? **[1 mark]**
10. Expand SIDBI. **[1 mark]**
11. What is bootstrapping? **[1 mark]**
12. What is piggybacking as an international-entry method? **[1 mark]**

SECTION B

Answer any THREE questions. Each carries 6 marks. (3 × 6 = 18)

1. Explain six entrepreneurial competencies that help a founder remain opportunity-oriented and resilient. **[6 marks]**
2. Explain any two idea-generation techniques and show how an entrepreneur screens the resulting ideas for opportunity potential. **[6 marks]**
3. Compare a sole proprietorship, LLP and private company on ownership, liability, continuity and capital; recommend one for a scalable two-founder venture. **[6 marks]**
4. Distinguish entrepreneurial environment from entrepreneurial ecosystem, and explain the roles of incubators and accelerators. **[6 marks]**
5. Compare debt and equity finance and recommend a suitable financing mix for an early-stage, high-growth venture. **[6 marks]**

SECTION C

Answer any TWO questions. Each carries 15 marks. (2 × 15 = 30)

1. Explain how entrepreneurs contribute to economic and broader social development. Illustrate how traits, mindset and contemporary entrepreneur types shape those contributions. **[15 marks]**
2. Explain the journey from idea generation to opportunity recognition and vertical selection. Include feasibility, scalability, SWOT and responsible-innovation checks. **[15 marks]**
3. Develop the sequence from business model and Business Model Canvas to business plan, prototype, MVP, pivot and scaling. Explain the major decisions at each stage. **[15 marks]**
4. Explain the major international-market entry strategies available to an entrepreneur and evaluate their differences in investment, control, risk and speed. **[15 marks]**

SECTION D

Case Study — Compulsory question. (1 × 12 = 12)

1. Circular Harvest Foods [12 marks]

Asha and Farah notice that fruit and vegetable vendors discard edible surplus every evening. They propose Circular Harvest Foods, a women-led venture that will buy safe surplus, use solar dryers to make shelf-stable snacks, and employ and train women from nearby self-help groups. A three-week campus pilot attracts repeat buyers, but customers ask for traceable sourcing and recyclable packaging. The founders plan subscription sales, retail partnerships and later overseas sales to Indian-food stores. They must choose a legal form, protect the brand and process know-how, meet food and data-related compliance, refine an MVP, secure finance, obtain incubation support and scale without weakening product safety or social impact.

- (a) Identify two entrepreneurial competencies shown by the founders and explain why the opportunity is socially and environmentally responsible. **[3 marks]**
- (b) Recommend a suitable ownership form and state two priority legal, food-safety, intellectual-property or data-compliance actions. **[3 marks]**
- (c) Outline an appropriate MVP, state one key Business Model Canvas decision, and propose one measurable social-impact indicator. **[3 marks]**
- (d) Identify one suitable support organisation, one enabling technology for traceability or operations, and one financing source or mix. Give a one-line reason for each. **[3 marks]**

Required total: 10 + 18 + 30 + 12 = 70 marks.

Module-balance audit

Current module	Model-paper coverage
Module 1 — foundations, traits, types and development	A1–2, B13, C18, D22(a)
Module 2 — ideas, opportunities, verticals and responsible innovation	A3–4, B14, C19, D22(a)
Module 3 — ownership, process and legal/compliance	A5–6, B15, D22(b)
Module 4 — model, plan, prototype, scaling and impact	A7–8, C20, D22(c)
Module 5 — environment, ecosystem, institutions and technology	A9–10, B16, D22(d)
Module 6 — finance and internationalisation	A11–12, B17, C21, D22(d)

Balance means meaningful offered coverage, not equal required marks: Sections A–C contain choice, so no single candidate answer set can force perfect equality.

Ranked backup watchlist

These are alternative angles to revise beyond the exact model wording. Some deepen a family touched briefly in the model; ‘backup’ therefore means a different assessable angle, not necessarily a disjoint topic. Confidence is a preparation tier, not a probability.

Rank	Backup topic	Tier	Concise rationale
1	Government policy, incentives and Startup India	A	6 prompts across 5/7, latest 2023; five-paper breadth, a recent 15-mark appearance and direct Module 5 alignment.
2	Intellectual-property types, protection and infringement	A	6 prompts across 5/7, latest 2023; five-paper breadth from 1 to 6 marks and direct Module 3 scope.
3	Entrepreneurship and economic/regional development extensions	A	5 prompts across 4/7, latest 2023; four-paper breadth with 38 known marks and central Module 1 alignment.
4	Feasibility, business location and capital-cost estimation	B	5 prompts across 4/7, latest 2023; strong historical Section A/C exposure; feasibility is the direct current anchor, while location/cost are adjacent historical variants.
5	Startup challenges, failure and recovery	B	5 prompts across 4/7, latest 2023; recent 15-mark use; current anchors are risk, resilience and scaling challenges rather than a standalone turnaround unit.
6	Women entrepreneurs, barriers and support	B	6 prompts across 3/7, latest 2023; direct and compulsory-case recurrence with current Module 1 relevance.
7	HUF, OPC, cooperative and family-business variants	B	4 prompts across 3/7, latest 2023; recent legal-form exposure and direct Module 3 scope beyond the model's three-form comparison.
8	Exit-strategy meaning, options and planning	B	4 prompts across 3/7, latest 2022; recurring direct/case treatment in three papers, though latest in 2022.
9	Responsible innovation and ethical-impact evaluation	C	Explicit Module 2 core; deeper long-answer treatment has little direct historical wording.
10	AI, IoT, AR, VR and Blockchain in the ecosystem	C	Explicit Module 5 core; historical corpus has only sparse digital-tools evidence.
11	Impact chain, metrics and triple bottom line	C	Explicit Module 4 core; older sustainable cases are thematic precedents, not wording repeats.
12	Cross-cultural entrepreneurship, international regulation and FEMA overview	C	Explicit Module 6 scope; older papers emphasize entry modes more than regulation.

Final caution

Seven programme-variant papers across four years cannot support statistical certainty. Use the model to practise structure and breadth; revise all six modules and do not treat rankings as guarantees of appearance.

ORIGINAL QUESTION PAPERS

The pages after this point reproduce all seven repository PDFs in chronological order. Each paper has a divider and PDF bookmark. The source wording, formatting and errors are preserved. The 2023 Regular file's extra footer-only third page is intentionally retained and is not a missing-content error.

12. What is the meaning of Family owned business?

SECTION - B**II) Answer any THREE questions. Each carries 6 marks. (3x6=18)**

13. Write Short notes on (a) Crowd funding (b)Angel Investing.
14. Briefly explain the Technical and Marketing aspects of Business plan .
15. Explain the types of Start-ups.
16. Explain the Various techniques of Business Valuation.
17. Briefly explain the role of WTO in promoting Entrepreneurship.

SECTION - C**III) Answer any TWO questions. Each carries 15 marks. (2x15=30)**

18. Who is a woman entrepreneur? Highlight the problems faced by a women entrepreneur in starting and running a business enterprise .
19. Briefly explain the process of starting an Enterprise?
20. Explain the various mode of going International.
21. Explain the role of any three Financial institutions in assisting entrepreneurs.

SECTION - D**IV) Case Study - Compulsory question. (1x12=12)****22. LUCK OR PERSISTENCE?**

When she was 11 years old, Kim Merritt sampled chocolate at a candy store and thought she could do better. She made her own recipes and began selling small candy bars in her home town of Cumberland, Maryland. The effort was much like that of man youngsters who open lemonade stand to

earn a few dollars to spend at the movies; however, people began asking her for more. Using meager profits and her mother's kitchen, Kim began making large batches of candy, then designed her own wrappers and developed a commission system for friends who sold chocolates at several schools.

Business was so good that it became an obsession. Kim worked after school, weekends and holidays and aside from a brief period when the health department suspended her operations until she could obtain proper permits to cook candy, she made candy by hand until she graduated from high school. At first, she could meet demand without special equipment or sacrificing other activities, but when she provided candy for a school fund-raising event, demand exceeded capacity, and Kim found herself buying professional equipment, hiring helpers, and purchasing bulk supplies.

Looking back, Kim recalls the obsession, the long hours, and the challenge to learn about business. Always on the initiative, Kim set about placing orders with local stores and developing contracts with dozens of schools and civic organizations. Her business, Kim's Khocolates, soon occupied her entire family and closest friends, and she registered the company and set up a chocolate boutique. During her first month, she had 18,000 orders, and before graduating from high school, Kim was distributing specialty chocolates to retail stores in three states.

In 1989, at age 21, Kim repositioned her company as a major distributor of specialty candies and began planning a chain of upscale chocolate shops for the 1990s. The chain would complement her candy manufacturing and distribution system, but it would also mean major changes in her organization. She paused to think about her plans, realizing that to launch a regional or national chain would mean a corporate endeavor. She and her family could not handle all the responsibilities, and the nature of Kim's Khocolates would change. This was not a pleasant thought, although the idea of pursuing a major business was exciting.

Reflecting on her business, Kim realized that she had fun and made a great deal of money, but many people considered her success no more than the luck of a personable young lady who made good candies and accidentally stumbled into a few good markets. On the other hand, Kim knew that she had worked extremely hard to attract clients. Most of her customers had not been comfortable buying from a young high school student, and she was seldom taken seriously by customers until they had dealt with her for a long time. Winning over her customers had always been a challenge to Kim, not a roadblock, and creating unusual candies have been a joy, not a job.

Thinking about her plans, she was not anxious to become a corporate manager, and although she had always worked well with others, Kim liked the feeling of independence. Running a company would mean sacrificing her autonomy, yet the idea of chain of store selling her specialty candies had

been a dream for years. At the same time, Expansion would mean financial risk, and Kim had always expenses to avoid even the slightest loss. She realized that she was at a major crossroad in her young career, and the choice seemed to be whether to follow her dream and expand or to be content with her existing business.

Case Questions:

- a. Identify the entrepreneurial characteristics of Kim Merritt and how they correspond to characteristics described for successful entrepreneurs
- b. Take a position regarding the decision facing Kim whether to expand into a chain of stores. Explain your position in terms of personal objectives you perceive essential to Kim and in terms of her perceived abilities.
- c. Based on what you know about Kim and what you believe her success was due to launch or persistence? Explain your position, and how luck plays a role in any venture.

22. AN EXPERIENCED WOMEN ENTREPRENEUR

Mrs KKK, hails from a very poor family background, had no formal education, and is about 80 years of age at present. She is honest and sincere in whatever she is doing. She is a very industrious person since her childhood. She likes to go to the markets (Haat) (weekly market) in different villages which sometimes are as far as 20-30kms to do trading various products including rice, different varieties of fruits and soaps.

Page 1 of 2

During this time, she learnt how to communicate with people and started building good relationships with regular customers and suppliers. She met many other great businesswomen and men at those times and made friendship with them. She worked so hard that very soon she became quite rich and able to support her family easily.

When she got married, she also got herself involved in agriculture, and produced lots of vegetables. She got considerable acres of land and hence was able to supply to various markets in plenty. She had several labourers and got them easily because of her earlier connections with many people from different villages in her earlier years. After 10 years of her work in agriculture she shifted her business to some construction and transport works, and invested in her first automobile, an old truck which in those days they called a 'Dok Truck'. It helped her in various ways and especially in carrying agricultural produce in those days. Later she bought a Jeep; again this had helped her in going from one village to the other. Due to her industriousness, she proved once again by making the transport business a success, and bought a short bus which was available at that time and an Ambassador car. This experience made her realize that business was profitable and she bought some more vehicles including buses and ambassadors which were better than the earlier ones.

Lack of competitors in those days had brought her huge profits. Mrs KKK never took a loan or any financial support from anyone or even from the bank in those days since she believes that it is only hard work and living a simple and economical lifestyle is adequate to help oneself financially. Although the transport business later went down since the Supreme Court order to ban deforestation. She was not discouraged by that and in fact, she availed many other new opportunities and now her businesses include a general store and real estates.

She mentioned a few things which are the most inevitable constraints; finance, ill-health and pregnancies. Other constraints she mentioned were employees not being loyal towards work, transportation cost are very high, competition is increasing, inflation, marketing the products and difficulties in getting customers, maintenance of business, retaining of employees.

Being illiterate, she has to depend on somebody to translate whatever is written on paper. However, these problems were overcome with experience, hard work, patience and family support. Instead of being a disadvantage, matrilineal has enabled Mrs KKK to exploit the greatest opportunity in being a successful entrepreneur. It has created in her the ability to be responsible, to be strong, to fight, and to foresee things.

Questions : (4 marks each)

- a. Identify the Key entrepreneurial competencies displayed by Mrs KKK .
2. What are the challenges faced by Mrs. KKK? How did she overcome the problems ?
3. Suggest ways by which Mrs. KKK can overcome her predicament.

18. How does entrepreneurship contribute to economic development of a nation?
19. What sources do entrepreneurs use to generate and select suitable product/project ideas.
20. Explain the techniques used to obtain data for making Capital Cost Estimates.
21. Discuss the modes that entrepreneurs use to enter into international business.

SECTION - D**IV) Case Study – Compulsory question.****(1x12=12)**

22.

NEED TO LOOK FOR NEW AVENUES

Setting up a venture in an altogether new field of business is not an easy task. After 30 successful years of trading in sesame seeds and oil, Harsh decided to look around for new opportunities and choose a suitable one. The increase in raw material prices (sesame seeds) because of exports, a change in customers' tastes with their preferences veering toward refined oil, and the larger slice of the market being grabbed by the organized sector were the key factors that has led to his decision to hunt for new avenues. After doing a thorough market study, he identified the product –purified drinking water– which he could supply. Doing a proper market survey to identify the product and find the gap in the present offerings requires a lot of effort. Once this work is done, one has to decide upon the plant location, layout, and finally the set up. The estimation of funds needed for capital and revenue expenditure, buying machinery, and other materials consumes a lot of time and energy. With the rise in the frequency of water-borne diseases, the government also campaigned for safe water. Doctors too were advising the residents to drink purified water.

To set up his water purification plant, Harsh hunted around for the vendors of the necessary machines (including a filter and chilling unit), tanks to store water, water cooler jars, and water coolers for delivering to the final customer, i.e. the retailers.

Harsh teamed up with his younger brother, Shyam, to look after the business. He took charge of production –procurement of water, filtration, and chilling of water, and filling and cleaning of the water coolers and jars. Shyam was allocated the work of marketing and supplying the water to the customers and collecting the payment.

Harsh started a water filling plant in the city of Bali in the north Indian state of Rajasthan to make sure that the filled water coolers were delivered on time as usual. On January 1, 2012, the first batch of purified water was rolled.

He was satisfied with the progress his new business had made in its initial three years. Through his business, he had been able to manage routine expenses and minor investments during the last three years. However, Harsh was troubled by the increasing competition and falling profit margins. He wondered how long his business would remain sustainable and how well it would do. He also wondered whether the Break Even Point (BEP) had been reached and when this business would become self-sustainable.

During his market survey, Harsh found that the suppliers of purified water who were operating then were serving textile mills, banks, the industrial area, and other big giants in the field within the city of Bali.

First year operation

The shopkeepers were amazed at the novel method of supplying drinking water in the retail market. They asked a few shop owners - Harsh's existing clients about the charges, quality of water, and services offered. Within a few days, more customers were added. In a month's time, the customer base went up to 50 from 30. In three months, this number had moved into three digits and Harsh was offering his services to 100-odd customers.

Second year learnings

The dawn of 2013 brought with it a good omen for Harsh. Sales in the first two months, January and February, escalated due to marriages and to new customers being added. People were placing orders for water coolers even for small social functions.

Completing third year

In the third year of functioning, the trend of the previous year continued during the first quarter of the calendar year. In April, Harsh participated in a tender for the supply of water to various booths for officials during the assembly election 2014.

Way ahead

Although the market for purified water had expanded during the three years in the city of Bali, many new players had joined the fray to grab the lucrative opportunity. Having a single plant in the heart of the city had proved beneficial to Harsh as other players' units were at faraway places.

Questions:

1. Outline the steps Harsh would have taken in formulating a business plan. **(6 marks)**
2. What do you think should be the key markets and strategies moving forward for Harsh's new business? **(6 marks)**

21. Discuss about the methods/modes of entry in the Foreign Market.

SECTION - D

IV) Case Study - Compulsory question.

(1x12=12)

22. Alicia Polak founded Khayelitsha Cookie Co. with an intention to help local women to change their lives. The tagline of KCC - "Creating opportunity one bite at a time" clearly represents the way Alicia selected to improve the standard of living of few people living in Khayelitsha that is one of the most unprivileged areas of South Africa. Khayelitsha is one of the largest and dangerous townships near Cape Town where most of the people live in extreme poverty and unemployment. KCC employed most of the women they had never been employed earlier and were living on grants of government. Skill training is one of the major activities at KCC. Employees were trained on various aspects of business viz. business communication, customer relationship management, inventory management, computer skills etc. along with baking, packing and labeling. Full time employment raised the self-esteem of the employees and made them feel proud; at the same time monetary benefits earned by them helped them to improve the way they used to live earlier.

Polak started the KCC investing her own money (\$10,000) with an expectation that if this model works, she will be able to help few people to change their lives. Initially, Nokwanda was the only employee working for KCC, but within two year of its inception KCC employed more than 10 employees to bake varieties of cookies (Choc Chunk, Ginger Snap, Safari, Brownies and Shortbread biscuits) and sell into coffee shops, restaurants and hotels. Within two years of its inception, KCC started selling an average of around 13,000 cookies in a month.

The Bakery manager of KCC, Zanele Bam who is in early thirties is a living testimonial depicting the success of this venture. She said “I have learned business skills, I have learned how to handle business tasks, how to work with clients and also communication skills. If you can’t manage yourself, you can’t manage others”.

In order to help the society, KCC donates a portion of its profit to the Philani Clinic in Khayelitsha. This cookie business owned a remarkable success as it got accepted by customers and retailers. In the year 2006, Oprah Winfrey recently featured KCC and its products on her TV Show, a highest rated talk show which is being watched by more than 22 million people. Alicia Polak is highly positive that she will be able to empower more and more women and to attract more international customers by replicating this KCC model in different countries irrespective of their languages and culture.

Questions:

1. Sketch a SWOT analysis of the case. **(4 marks)**
2. Identify the entrepreneurial traits of Alicia Polak **(4 marks)**
3. What are the challenges faced by women entrepreneurs? **(4 marks)**
